

AMENDMENTS TO CLAIMS

1. (Original) A method of reproducing information using an information recording medium in a client/server system, the method comprising the steps of:
 - (a) a client obtaining characteristic information of the information recording medium;
 - (b) the client transmitting the characteristic information to a server;
 - (c) the server obtaining usage information of the information recording medium based on the characteristic information;
 - (d) the server transmitting information based on the usage information to the client; and
 - (e) the client reproducing the information recorded on the information recording medium in accordance with the information based on the usage information

2. (Original) A method of reproducing information using an information recording medium in a client/server system, the method comprising the steps of:
 - (a) a client obtaining characteristic information of the information recording medium;
 - (b) the client transmitting the characteristic information to a first server;
 - (c) the first server obtaining usage information of the information recording medium based on the characteristic information;
 - (d) the first server transmitting first information based on the usage information to a second server;
 - (e) the second server transmitting second information stored therein to the client in accordance with the first information based on the usage information; and
 - (f) the client reproducing the information based on the second information received from the second server.

3. (Original) The method as claimed in claim 2, wherein in said step (b), the client transmits the characteristic information to the first server via the second server.

4. (Canceled)

5. (Currently amended) A server providing information to a client using an information recording medium in response to a request of the client, the server comprising:

a first part configured to receive characteristic information of the information recording medium from the client;

a second part configured to obtain usage information of the information recording medium based on the characteristic information; and

a third part configured to transmit to the client ~~information as to whether reproduction of information from the information recording medium is authorized based on the usage information~~ information on authorization of reproduction of information from the information recording medium based on the usage information.

6. (Original) The server as claimed in claim 5, further comprising:

a fourth part configured to receive from the client the characteristic information of the information recording medium and notification requesting stoppage of usage of the characteristic information; and

a fifth part configured to delete the usage information of the information recording medium based on the characteristic information.

7. (Currently amended) A computer-readable recording medium storing a program for causing a computer to execute a method, the method comprising the steps of:

(a) receiving, based on a request of a client using an information recording medium, characteristic information of the information recording medium from the client;

(b) obtaining usage information of the information recording medium based on the characteristic information; and

(c) transmitting to the client information ~~as to whether reproduction of information from the information recording medium is authorized based on the usage information~~ on authorization of reproduction of information from the information recording medium based on the usage information.

8. (Original) The computer-readable recording medium as claimed in claim 7, wherein the method further comprises the steps of:

(d) receiving from the client the characteristic information of the information recording medium and notification requesting stoppage of usage of the characteristic information; and

(e) deleting the usage information of the information recording medium based on the characteristic information.

9. (Canceled)

10. (Original) A computer-readable recording medium storing a program for causing a computer to execute a method, the method comprising the steps of:

(a) obtaining characteristic information of an information recording medium;

(b) requesting a server to provide information and transmitting the characteristic information to the server so that the server obtains usage information of the information recording medium;

(c) receiving information based on the usage information from the server; and

(d) reproducing information recorded on the information recording medium in accordance with the information based on the usage information.
